

Subject Index to Volume 14

A

Acetylcholine

- effects on chloride and potassium conductances in bronchial smooth muscle, L772
- in isolated airways, species differences in, L722
- release from tracheal parasympathetic nerves, potentiation by cAMP, L541

Actin

- in airway epithelial cells, regulation by PKC- α and calpain II, L526
- F-actin, in airway epithelium, L224

Acute respiratory distress syndrome

- inflammation in, L159
- pathophysiology, L695, L921
- platelet-activating factor release in, and stimulation of lung pericyte growth, L298
- salt and water transport across alveolar and distal airway epithelia in, L487

Adenosine 3',5'-cyclic monophosphate

- accumulation in airway smooth muscle, muscarinic inhibition of, L199
- potentiation of acetylcholine release from tracheal parasympathetic nerves, L541

Adenosine 5'-triphosphate

- and chloride secretion in cultured human tracheal glands, L979
- leukocyte adherence induced by, in pulmonary artery endothelial cells, L695
- synthesis by alveolar type II cells, inhibition by nitric oxide, L898
- utilization and supply in embryonic cardiac myocytes, during hypoxia, L44

Adenovirus

- E1A 13S gene product, upregulation of tumor necrosis factor gene, L535

Adenylyl cyclase

- in airway smooth muscle cells, muscarinic inhibition of, regulation of intracellular calcium by, L208

β -Adrenergic agonists

- attenuation of fibroblast-mediated collagen gel contraction, L829

β -Adrenergic receptors

- in asthmatic lung, L947
- pulmonary β_2 -, in modulation of airway cilia, L745

Adrenomedullin

- pulmonary vasodilator response to, effects of nitric oxide synthase inhibitors, L782

Adult respiratory distress syndrome

- see* Acute respiratory distress syndrome

Airway

- see also* Muscle, smooth
- hyperresponsiveness in asthma, and autonomic receptors, L947
- inflammation

- see also* Asthma
- adenovirus-mediated, L535
- in adult respiratory distress syndrome, L159
- chronic infection-induced, effects of sensory denervation on, L393

- grain dust-induced, in mice, endotoxin in, L1052
- IL-5 and eosinophilic airway infiltration in, L368
- neurogenic, L393, L404
- isolated, acetylcholine in, species differences in, L722
- submucosal gland secretion, bradykinin and, L907

Alveolar cells

- see also* Epithelial cells, alveolar;

- Macrophages, alveolar
- basement membrane, L3
- contractile interstitial, hypoxic contraction, L962
- expression and distribution of surfactant proteins and lysozyme in, effects of hyperpnea on, L320
- surface, L3
- type II

- ATP and surfactant synthesis, inhibition by nitric oxide, L898
- chemotaxis in vitro, regulation, L311
- differentiation in culture, L483
- epidermal growth factor receptor network, in hyperoxia, L242
- exocytosis of lamellar bodies from, annexin II in, L668
- fetal, surfactant lipid secretion from, stimulation by gastrin-releasing peptide, L331
- fetal rat, whole cell potassium currents in, L577
- fibronectin and laminin synthesis, L215
- growth on pulmonary endothelial extracellular matrix, L1017
- ion transport across, L1008
- lipid uptake, modulation by surfactant proteins, L69
- response to coal dust, L123
- structure and function, extracellular matrix and, L3
- surfactant-mediated uptake of antioxidant enzymes, L659

Alveolar macrophages, *see* Macrophages, alveolar

Alveoli

- see also* Alveolar cells; Epithelial cells, alveolar; Epithelium, alveolar

- development in fetal rat lung, L619
- formation
- effects of postnatal retinoic acid treatment on, L305
- in females, estrogen and, L110
- regulation by retinoic acid, L171

Angiogenesis

- pulmonary, endothelial nitric oxide synthase immunoreactivity during, L88

Angiotensin-converting enzyme

- monoclonal antibody to, internalization by endothelial cells, L704
- substrate conformation, effects on fractional hydrolysis in lung, L251

Angiotensin II

- calcium oscillations induced by, in myocytes from rat pulmonary artery, L637

Angiotensin II receptors

- AT₁, activation in pulmonary vasculature, L637

Annexins

- I, IV, and VI, cellular and subcellular localizations, in lung epithelia, L863
- II, in exocytosis of lamellar bodies from alveolar epithelial type II cells, L668

Antioxidants

- enzymes as, L790
- expression in rat lung during hyperoxia, L810
- surfactant-mediated uptake of, L659
- glutathione peroxidase as, in lung, L173
- nordihydroguaiaretic acid as, in lung, L266

Antithrombin III

- attenuation of endotoxin-induced pulmonary vascular injury, L921

Aquaporins

- in alveolar and distal airway epithelia, L487

Arachidonic acid

- release from bovine tracheal epithelial cells, tannin-stimulated, L613

Asthma

- airway smooth muscle cell phenotype in, L1040
- airway wall remodeling in, differential effects of PDGF isoforms and receptors in, L415
- autonomic receptor expression in lung and, L947
- endotoxin and, L736
- eosinophilic airway infiltration and, L368
- lipopolysaccharide-binding protein in bronchoalveolar compartment in, L736
- pathogenesis, L1002
- pathophysiology, L1040
- soluble CD14 in bronchoalveolar compartment in, L736

B

Benzoyl-phenylalanyl-glycyl-proline

- hydrolysis kinetics, in lung, L251

Bicarbonate ion

- secretion, in distal airway, L289

Bradykinin

- regulation of airway submucosal gland secretion, L907

Bradykinin receptors

- subtypes, in regulation of airway submucosal gland secretion, L907

Bronchodilation

- with magnesium sulfate, mechanisms of, L469

Byssinosis

- pathophysiology, L613

C

Caffeine

- effects on chloride and potassium conductances in bronchial smooth muscle, L772

Calcium channels

- voltage-dependent, effects of magnesium sulfate on, L469

Calcium ions

- intracellular
 - in airways, reduction by magnesium sulfate, L469
 - in airway smooth muscle cells, regulation by muscarinic inhibition of adenyl cyclase, L208
 - and airway submucosal gland secretion, L907
 - and chloride secretion in cultured human tracheal glands, L979
 - oscillations, angiotensin II-induced, in vascular myocytes from rat pulmonary artery, L637
 - in oxidant-mediated endothelial injury, L973
 - signaling, in vascular endothelial cells, modulation by peroxynitrite, L954

Calpain II

- in regulation of cytoskeletal architecture in airway epithelial cells, L526

Capsaicin

- sensory denervation, by exacerbation of *Mycoplasma pulmonis* infection by, L393

Cardiomyocytes

- embryonic, energy utilization and supply during hypoxia, L44

Catalase

- mRNA-binding domain, and dinucleotide-binding site of bovine liver catalase, homology, L790
- surfactant-mediated uptake of, by type II cells and lung tissue, L659

Cell-cell interactions

- in intravascular inflammation, L28

Cell cycle

- arrest in G₀/G₁ phase, in mink Mv1Lu lung epithelial cells, by contact inhibition and TGF- β 1, L879

Cell differentiation

- airway epithelial cell, L1017
- alveolar type II, in culture, L483
- during lung development, LAR-PTP2 and, L566
- retinoid-induced, eicosanoid production during, L854
- airway mucous cell, mucin gene expression during, L846

Cell migration

- see also **Chemotaxis**
- alveolar epithelial cell, in vitro, L311
- polymorphonuclear cell, after intraperitoneal and intratracheal endotoxin administration, L836

Chemotaxis

- see also **Cell migration**
- neutrophil, to *Pseudomonas* airspace infections, alveolar macrophage depletion and, L819
- type II epithelial cell, regulation in vitro, L311

Chloride channels

- in fetal distal lung epithelium, L1060

Chloride ions

- conductance, in bronchial smooth muscle, effects of acetylcholine and caffeine on, L772
- metalloporphyrin ionophores, induction of anion permeability by, L386
- secretion
 - in cultured human tracheal glands, regulation by P_{2u}-purinoceptors, L979
 - in distal airway, L289

Choline acetyltransferase

- activity in airway mucosa, L722

Contact inhibition

- and negative regulation of Mv1Lu cell cycle in G₀/G₁, L879

Cyclin

- and negative regulation of Mv1Lu cell cycle in G₀/G₁, L879

Cyclooxygenase-2

- upregulation by acute hypoxia in rat lung, L872

Cystic fibrosis

- treatment, L386

Cytokines

- effects on type II alveolar cell chemotaxis in vitro, L311
- expression in rat lung, and endotoxin-induced group II PLA₂ activation, L752
- pulmonary release of, after hemorrhage, L729
- response to endotoxin, in isolated lungs, L62
- synthesis in lung fibroblasts, effects of surfactant on, L159

Cytoskeleton

- architecture in airway epithelial cells, regulation by PKC- α and calpain II, L526
- during cold preservation of pulmonary arterial smooth muscle cells, L435

D**Development, see Lung, development****Dexamethasone**

- effects on pulmonary gas exchange area, postnatal retinoic acid treatment and, L305

Disseminated intravascular coagulation

- pathophysiology, L921

DNA

- see also **Gene expression; Gene therapy; Gene transfer**
- endotoxin-induced damage, in pulmonary endothelial cells, inhibition by integrins, L689
- synthesis, in lung fibroblasts, effects of surfactant on, L159

E**Edema**

- pulmonary, see **Pulmonary edema**

Endothelial cells

- airway
 - endotoxin-induced DNA strand breakage in, inhibition by integrins, L689
 - in inflammatory response to inhaled antigen, L736
- alveolar, annexin VI in, L863
- microvascular
 - hyperoxia-responsive proteins in, L517
 - oxidant-mediated injury, mechanisms of, L973
- pulmonary artery
 - ATP-induced leukocyte adherence to, L695
 - nitric oxide synthase gene expression, L643
 - red blood cell adhesion to, endotoxin-induced, L28

pulmonary vascular

- calcium signaling in, modulation by peroxynitrite, L954
- endotoxin-induced injury, attenuation by antithrombin III, L921
- hydrogen peroxide-mediated injury, prevention by nitric oxide donor, L931
- internalization of monoclonal antibody to angiotensin-converting enzyme, L704
- of rat tracheal mucosa, substance P receptor immunoreactivity on, L404

Endothelin-1

- activity in human, dog, and rabbit airways, L37
- endothelial and epithelial sources, in sheep bronchi, L54
- overexpression, in pulmonary hypertensive rats, L101

Endothelin receptors

- type A, in canine airway, L37
- type B, in human and rabbit airway, L37

Endothelium

- airway, endothelin-1 in, L54
- microvascular, nitric oxide synthase expression, in chronically hypoxic rat lung, L164

Endotoxin

- asthma and, L736
- cytokine response to, in isolated lungs, L62
- DNA strand breakage induced by, inhibition by integrins, in pulmonary endothelial cells, L689
- in grain dust-induced lung inflammation in mice, L1052
- intraperitoneal and intratracheal administration, polymorphonuclear cell migratory responses after, L366
- intravenous vs. intratracheal challenge with, compartmentalization of glucose utilization after, L452
- pulmonary vascular injury due to, attenuation by antithrombin III, L921
- and red blood cell adhesion to pulmonary endothelium, L28
- stimulation of group II PLA₂ expression, in rat lung, L752

Eosinophils

- adhesion to fibronectin, activation in bronchoconstriction, L587
- and airway hyperresponsiveness, L368

Epidermal growth factor

- effects on alveolar epithelial junctional permeability and active sodium transport, L559
- effects on type II alveolar cell chemotaxis in vitro, L311

Epinephrine

- effects on fibroblast-mediated collagen gel contraction, L829

Epithelial cells

- airway
 - see also **Alveolar cells, type II**
 - autocrine regulatory factors in, L346, L353
 - cultures, induction of increased anion permeability in, L386
 - cytoskeletal architecture in, regulation, L526

- growth on pulmonary endothelial extracellular matrix, L1017
human nasal explants of, serous and mucous cell secretion from, L595
lipid uptake, modulation by surfactant proteins, L69
mink Mv1Lu, cell-cycle arrest in G₀/G₁ phase by contact inhibition and TGF- β 1, L879
paracrine regulatory factors in, IL-6 as, L346
proliferation/differentiation, L566
response to coal dust, extracellular matrix and, L123
secretory, phenotypic alterations in culture, L595
- alveolar**
in culture, studies of lung biology using, L484
L2, glutamine synthetase expression in, regulation by glucocorticoids, L141
migration in vitro, L311
parathyroid hormone-related protein as autocrine regulatory factor in, L353
- bronchial**
extracellular glutathione peroxidase in, L173
interleukin-6 receptor expression in, L346
neutrophil adhesion to, L80
- tracheal**
retinoid-induced differentiation, eicosanoid production during, L854
tannin-stimulated arachidonic acid release from, L613
- Epithelial lining fluid**
extracellular glutathione peroxidase in, L173
glucose in, L183
- Epithelium**
airway
cellular and subcellular localizations of annexins I, IV, and VI in, L863
electrical resistance, L224
endothelin-1 in, L54
expression of LAR-PTP2, in rat, L566
fetal, bioelectric properties, Po₂ and, L1060
fluid transport across, L232
ion transport across, L289
salt and water transport across, in adult lung, L487
sodium-potassium ATPase activity, enhancement by nitrogen dioxide, L266
tight junctions, effects of HOCl on, L224
upper, signal transduction mechanisms modulating ciliary beat frequency in, L745
- alveolar**
barrier properties, epidermal growth factor and, L559
development, in fetal rat lung, L619
glucose transport and equilibrium across, L183, L191
junctional permeability and active sodium transport, effects of EGF on, L559
salt and water transport across, in adult lung, L487
- Erythrocytes**
adhesion to pulmonary endothelium, endotoxin-induced, L28
- Estrogen**
effects on lung gas-exchange surface area and alveoli, in female rats, L110
- Exotoxin A**
stimulation of fluid reabsorption in lung, L232
- Extracellular matrix**
alveolar, and epithelial cell response to coal dust, L123
biology, in lung, L3
cell interactions with, in rat lung fetal, L459, L577
neonatal, L376
effects on type II alveolar cell chemotaxis in vitro, L311
type II pulmonary epithelial cell, regulation of, L215
- F**
- Fetus**
alveolar type II cells
surfactant lipid secretion from, stimulation by gastrin-releasing peptide, L331
whole cell potassium currents, in rat, L577
- lung**
alveolar development, in rat, L619
bioelectric properties of epithelium, Po₂ and, L1060
development in rat, expression of nitric oxide synthase isoforms during, L88
fibronectin and laminin receptors in, L459
ion transport across epithelium, L1008
surfactant secretion, stimulation by gastrin-releasing peptide, L331
pulmonary arterial endothelial cells, nitric oxide synthase gene expression, L643
- Fibroblasts, pulmonary**
effects of surfactant on, L159
stability of tropoelastin mRNA in, in neonatal rat, effects of serine proteinase inhibitors on, L376
- Fibronectin**
effects on type II alveolar cell chemotaxis in vitro, L311
eosinophil VLA-4 binding to, effects on bronchial narrowing, L587
synthesis, in type II pulmonary epithelial cells, L215
- Fibronectin receptors**
on fetal rat lung cells, L459
- G**
- Gamma-glutamyl transpeptidase**
expression in hyperoxic rat lung, L115
- Gastrin-releasing peptide**
stimulation of surfactant lipid secretion from fetal type II pneumocytes, L331
- Gene expression**
antioxidant enzyme, in hyperoxic rat lung, L810
cyclooxygenase-2, in hypoxic rat lung, L872
- γ -glutamyl transpeptidase, in hyperoxic rat lung, L115
glutamine synthetase, in lung epithelial cells, regulation by glucocorticoids, L141
group II PLA₂, endotoxin-induced, in rat lung, L752
interleukin 6 receptor, in bronchial epithelial cells, regulation by IL-1 and IL-6, L346
lysozyme, after prolonged hyperpnea, L320
MUC5 and MUC1, regulation, L846
mucin, during airway mucous differentiation, L846
nitric oxide synthase
in chronically hypoxic rat lung, L164
upregulation by oxygen, in ovine fetal pulmonary artery endothelial cells, L643
surfactant protein
after prolonged hyperpnea, L320
SP-A, in vitro analysis of, L504
SP-B, regulation, L601
tropoelastin, glucocorticoid-induced, regulation by TGF- β 3, L992
tumor necrosis factor, upregulation by adenovirus E1A 13S gene product, L535
type I receptor serine-threonine kinase, in pulmonary blood vessels, L547
- Gene regulation**
cytokine, after hemorrhage, L729
surfactant protein B, in murine lung, L714
- Gene therapy**
for cystic fibrosis, L386
pulmonary physiology and, L1
- Gene transfer**
plasmid-mediated, to rat diaphragm, L1023
- Glucocorticoids**
regulation of glutamine synthetase expression in lung epithelial cells, L141
- Glucose**
airspace, in air- and fluid-filled lungs, L183
transport across alveolar-airway barrier, L183, L191
utilization, compartmentalization after intravenous vs. intratracheal challenge with endotoxin, L452
- Glutamine synthetase**
expression in lung epithelial cells, regulation by glucocorticoids, L141
- Glutathione**
protective effect against oxidative lung injury, in preterm rabbits, L446
- Glutathione peroxidase**
extracellular, in human lung epithelial lining fluid and lung cells, L173
- Granulocyte macrophage-colony stimulating factor**
and surfactant metabolism, L650
- Guanosine 3',5'-cyclic monophosphate**
in modulation of airway cilia, L745
- H**
- Hemorrhage**
activation of NF- κ B in murine lung mononuclear cells vivo, L729

Heparin

commercial preparations, differential effects on sodium/hydrogen exchange and growth of pulmonary artery smooth muscle, L260

Hepatocyte growth factor

mitogenic action on lung epithelial cells in vivo, L1031
as pulmotrophic factor, L1031

Host defense

phagocytosis by alveolar macrophages in, surfactant protein A-stimulated, L677

Hydrogen peroxide

endothelial cell injury induced by, prevention by nitric oxide donor, L931

Hyperoxia

antioxidant enzyme expression in rat lung during, L810
increased lung γ -glutamyl transpeptidase in, L115
lung injury in
and EGF receptor network, L242
lung γ -glutamyl transpeptidase and, L115
protection against, in preterm rabbits, L446
protein S-glutathiolation in, L115
in rat pulmonary microvascular endothelial cells, L517
proteins responsive to, in rat pulmonary microvascular endothelial cells, L517
type 2 cell epidermal growth factor receptor network in, L242

Hyperpnea

effects on expression and distribution of surfactant proteins and lysozyme, L320

Hypoxia

chronic, nitric oxide synthase expression in, in rat lung, L164
contraction of isolated pulmonary contractile interstitial cells in, L962
effects on cyclooxygenase-2 gene expression in rat lung, L872
effects on xanthine dehydrogenase and xanthine oxidase activity, L941
embryonic cardiomyocyte energy utilization and supply during, L44
pulmonary artery response to, ATP-sensitive potassium channel and, L803

I**Inflammation**

in adult respiratory distress syndrome, L159

airway

see also **Asthma**

adenovirus-mediated, L535
chronic infection-induced, effects of sensory denervation on, L393
grain dust-induced, in mice, endotoxin in, L1052
IL-5 and eosinophilic airway infiltration in, L368
neurogenic, L393, L404
intravascular, cell-cell interactions in, L28
pulmonary vascular, endotoxin in, L28
Inflammatory mediators
synthesis in lung fibroblasts, effects of surfactant on, L159

Integrins

β_2 -, in stimulation of neutrophil adhesion to bronchial epithelial cells, L80
alveolar, L3
inhibition of endotoxin-induced DNA strand breakage in pulmonary endothelial cells, L689

Intercellular adhesion molecule

ICAM-1
gene regulation, TNF- α and, L714
in stimulation of neutrophil adhesion to bronchial epithelial cells, L80

Interferon- γ

and muramyl tripeptide, liposome aerosols of, activation of mouse alveolar macrophages by, L429
in stimulation of neutrophil adhesion to bronchial epithelial cells, L80

Interleukin receptors

IL-6, expression in bronchial epithelial cells, regulation by IL-1 and IL-6, L346

Interleukins

IL-1 β , expression in rat lung, and endotoxin-induced group II PLA₂ activation, L752
IL-5
effects on airway, in guinea pig, L368
guinea pig, production and characterization in baculovirus-infected insect cells, L1002
IL-6
autocrine and paracrine functions in airway epithelial cells, L346
synthesis in lung fibroblasts, effects of surfactant on, L159

Ion currents

in human bronchial muscle cells, regulation, L772

Ionophores

metalloporphyrin, induction of anion permeability by, L386

Ion transport

across fetal sheep alveolar epithelium, L1008
distal airway
in adult lung, L487
regulation, L289
in fetal rat type II cells cultured on Matrigel, L577

Isoproterenol

effects on fibroblast-mediated collagen gel contraction, L829

L**Lamellar bodies**

exocytosis from alveolar epithelial type II cells, annexin II in, L668
expression and distribution of surfactant proteins and lysozyme in, effects of hyperpnea on, L320

Laminin

effects on type II alveolar cell chemotaxis in vitro, L311
on fetal rat lung cells, L459
synthesis in type II pulmonary epithelial cells, L215

Leukocyte elastase

human, inhibition by mineral dust particles, L761

Leukocytes

ATP-induced adherence to pulmonary artery endothelial cells, L695

Leukotrienes

LTC₄, secretion, and bronchoconstriction, L587

Lipids

aggregation in lung, and surfactant injury, L273, L281
uptake by pulmonary epithelial cells, modulation by surfactant proteins, L69

Lipopolysaccharide, see Endotoxin**Liposome aerosols**

of IFN- γ and muramyl tripeptide, activation of mouse alveolar macrophages by, L429

5-Lipoxygenase

eosinophil, activation, and bronchoconstriction, L587

LPS (Lipopolysaccharide), see Endotoxin**Lung**

development
see also **Fetus, lung**
effects of postnatal treatment with retinoic acid, L305
epithelial cell proliferation/differentiation during, LAR-PTP2 and, L566
expression of nitric oxide synthase isoforms during, in rat, L88
glucocorticoid action on, L992
LAR-PTP2 localization during, L566
sodium-potassium ATPase regulation during, L619
type I receptor serine-threonine kinase expression during, L547
extracellular matrix biology in, L3
fetal, see **Fetus, lung**
gas-exchange region, sexual dimorphism, estrogen and, L110
regeneration after acute lung injury, L1031
surfactant-mediated uptake of antioxidant enzymes, L659
transition from fetal to neonatal life, nitric oxide in, L88

Lung disease

caused by *Pseudomonas aeruginosa*, L232
eosinophilic airway infiltration and, L368

Lung injury

acute
lung regeneration after, L1031
salt and water transport across alveolar and distal airway epithelia in, L487
endotoxin-induced, endothelial, attenuation by antithrombin III, L921
epithelial repair after, L311
and extracellular glutathione peroxidase in lung epithelial lining fluid and lung cells, L173
extracellular matrix in, L3
fluid reabsorption in, exotoxin A and, L232
hyperoxic
and EGF receptor network, L242
lung γ -glutamyl transpeptidase and, L115
protection against, in preterm rabbits, L446
protein S-glutathiolation in, L115

in rat pulmonary microvascular endothelial cells, L517
 oxidant-mediated, endothelial, mechanisms of, L973
 oxidative, protection against, in preterm rabbits, L446
 ozone-induced, and vitamin A deficiency, L475
 platelet-activating factor release in, and stimulation of lung pericyte growth, L298
 protective effect of nordihydroguaiaretic acid, L266
 surfactant aggregate conversion in, L152

Lysozyme

regulation and distribution after prolonged hyperpnea, L320

M

Macrophages, alveolar

activation by aerosolized liposomes of IFN- γ and muramyl tripeptide, L429
 antitumor properties of, L429
 depletion, and neutrophil chemotaxis to *Pseudomonas* airspace infections, L819
 extracellular glutathione peroxidase in, L173
 modulation of epithelial cell response to coal dust, L123
 phagocytosis by, stimulation by surfactant protein A, L677

Magnesium sulfate

reduction of intracellular calcium in airways, L469

Major basic protein

airway smooth muscle contraction and, in guinea pig trachealis, L133

Mast cells

degranulation in rat trachea, substance P and, L985

Messenger RNA, stability

and glutamine synthetase expression in septic shock, L141
 tropoelastin mRNA, in neonatal rat pulmonary fibroblasts, serine proteinase inhibitors and, L376

Metalloporphyrin

chloride ionophores, induction of anion permeability by, L386

Methodologies

for analyzing exhaled air samples, L914
 for analyzing rat surfactant protein A gene expression in vitro, L504
 for cloning, expressing, and recovering biologically active IL-5, L1002
 for determining exhaled nitric oxide, L914
 for laser confocal microscopy of airway epithelium, L224
 for measuring pulmonary expression and distribution of surfactant proteins and lysozyme, L320
 for measuring surfactant in lambs in vivo, L273
 for mobility shift assays, and in vitro analysis of rat surfactant protein A gene expression, L504
 for patch clamp of type II cells cultured on Matrigel, L577

for plasmid-mediated in vivo gene transfer to rat diaphragm, L1023

Mice

see also **Transgenic mice**
 grain dust-induced lung inflammation in, endotoxin in, L1052
 ozone-induced lung injury in, vitamin A and, L475

Mineral dust particles

inhibition of human leukocyte elastase, L761

Mucins

gene expression during airway mucous differentiation, L846

Muscarinic receptors

in asthmatic lung, L947
 in modulation of airway cilia, L745
 regulation of synaptic transmission in airway parasympathetic ganglia, L630
 reserve, for inhibition of cAMP accumulation in airway smooth muscle, L199

Muscle, smooth

airway
 calcium-activated potassium channels in, stimulation by sodium nitroprusside, L338
 cell growth response, phospholipase C and tyrosine kinase systems in, L795
 contraction, cationic proteins and, L133
 endothelin-1 in, L54
 mitogenesis, PDGF receptors and, L415
 muscarinic inhibition of adenylyl cyclase and regulation of intracellular calcium in, L208
 muscarinic receptor reserve for inhibition of cAMP in, L199
 phenotypic markers, L1040
 bronchial
 chloride and potassium conductances in, effects of acetylcholine and caffeine on, L772
 PDGF isoform-induced proliferation and receptor expression in, L415
 pulmonary artery
 effects of cold preservation on, L435
 growth, differential effects of commercial preparations of heparin on, L260
 proliferation, in pulmonary hypertensive rats, L101
 serotonin-induced mitogenesis and tyrosine phosphorylation in, inhibition by nitroprusside, L362

Mycoplasma pulmonis

infection, exacerbation with sensory denervation by neonatal capsaicin treatment, L393

Myocytes

see also **Muscle, smooth**
 cardiac, see **Cardiomyocytes**
 tracheal, growth response, role of phospholipase C and tyrosine kinase systems in, L795
 vascular, from rat pulmonary artery, angiotensin II-induced calcium oscillations in, L637

N

Neurokinin-1 receptors

on endothelial cells, at sites of plasma leakage, in rat tracheal mucosa, L404

Neutrophils

adhesion to bronchial epithelial cells, L80
 chemotaxis to *Pseudomonas* airspace infections, alveolar macrophage depletion and, L819

Newborn, preterm, see Preterm newborn

Nitric oxide

antimitogenic actions on smooth muscle cells, L362
 exhaled, factors affecting, L914
 inhaled, effects on surfactant system of lambs in vivo, L273
 inhibition of alveolar type II cell metabolism, L898
 in modulation of airway cilia, L745
 prevention of hydrogen peroxide-induced endothelial cell injury, L931
 in pulmonary transition from fetal to neonatal life, L88
 release, in lung, L914

Nitric oxide synthase

endothelial, expression in chronically hypoxic rat lung, L164
 gene expression, upregulation by oxygen, in ovine fetal pulmonary artery endothelial cells, L643
 inducible, expression in chronically hypoxic rat lung, L164
 inhibitors, effects on pulmonary vasodilator response to adrenomedullin, L782
 isoforms, expression in developing rat lung, L88

Nitrogen dioxide

effects on airway epithelial sodium-potassium ATPase activity, L266
 enhancement of airway epithelial Na⁺-K⁺-ATPase activity, L266

Nitroprusside, see Sodium nitroprusside

Nordihydroguaiaretic acid

and oxidant stress in airway epithelium, L266

Nuclear factor- κ B

activation by hemorrhage, in murine lung mononuclear cells vivo, L729

O

Oxidant stress, in airway epithelium

nordihydroguaiaretic acid and, L266
 sodium-potassium ATPase activity and, L266

Oxygen

see also **Hyperoxia; Hypoxia**
 alveolar, at birth, and bioelectric properties of fetal distal lung epithelium, L1060
 consumption
 in embryonic cardiac myocytes, during hypoxia, L44
 and gas-exchange surface area in lung, L110
 effects on nitric oxide synthase gene expression, in ovine fetal pulmonary artery endothelial cells, L643

Ozone

lung injury caused by, and vitamin A deficiency, L475

P

Paracellular permeability, *see* **Permeability, paracellular**

Parasympathetic nervous system
airway ganglia, neuromodulatory effect of muscarinic receptors on, L630

Parathyroid hormone-related protein
as autocrine regulatory factor in alveolar epithelial cells, L353

Permeability

alveolar-airway barrier, to glucose, L183, L191
endothelial, hydrogen peroxide-induced increase in, L973
ion, distal airway epithelium in adult lung, L487
paracellular, and airspace liquid clearance, L183, L191
vascular, and neurogenic airway inflammation, L393, L404
water, distal airway epithelium in adult lung, L487

Peroxyinitrite

modulation of calcium signaling in vascular endothelial cells, L954

Phosphatidylinositol

formation in growth response of human tracheal myocytes, L795

Phospholipases

group II PLA₂, endotoxin-induced, in rat lung, L752
PLA₂, cytosolic, expression during retinoid-induced differentiation in tracheal epithelium, L854
PLC, growth response of human airway smooth muscle cells and, L795

Platelet-activating factor

stimulation of lung pericyte growth in vitro, L298

Platelet-derived growth factor

activation of sodium/hydrogen antiporter, inhibition by different heparin preparations, L260
isoforms, and differential proliferation in bronchial smooth muscle, L415

Platelet-derived growth factor receptors

expression, PDGF isoform-induced, in bronchial smooth muscle, L415

Pneumoconiosis

pathophysiology, L761

Pneumocytes, type II, *see* Alveolar cells, type II**Polymorphonuclear cells**

adherence to endothelial cells, L695
migratory responses after intraperitoneal and intratracheal endotoxin administration, L836

Porphyrin manganese(III) chloride

induction of anion permeability in lung epithelial cells, L386

Potassium channels

see also **Sodium-potassium ATPase**
ATP-sensitive, and hypoxic response in rat pulmonary artery, L803
calcium-activated, in porcine tracheal smooth muscle cells, stimulation by sodium nitroprusside, L338

calcium-dependent, and chloride secretion in cultured human tracheal glands, L979

whole cell, in fetal rat alveolar type II cells, L577

Potassium ions

conductance in bronchial smooth muscle, effects of acetylcholine and caffeine on, L772

Preservation fluids

efficacy during cold preservation of pulmonary arterial smooth muscle cells, L435

Preterm newborn

oxidative lung injury in, protection against, L446

Prostaglandin

in modulation of airway cilia, L745
PGE₂, synthesis in lung fibroblasts, effects of surfactant on, L159

Prostaglandin H synthase

expression during retinoid-induced differentiation in tracheal epithelium, L854

Protein

cationic, airway smooth muscle contraction and, L133
S-glutathiolation, in hyperoxic rat lung, L115
turnover, hyperoxia-dependent, in rat pulmonary microvasculature, L517

Protein kinases

PKC, and airway response to endothelin, L37
PKC- α , in regulation of cytoskeletal architecture in airway epithelial cells, L526

Pseudomonas

airspace infections, neutrophil chemotaxis to, L819

Pseudomonas aeruginosa

lung disease caused by, L232

Pulmonary artery

endothelial cells
ATP-induced leukocyte adherence to, L695
red blood cell adhesion to, endotoxin-induced, L28
fetal, endothelial cells, nitric oxide synthase gene expression, L643
hypoxic response, ATP-sensitive potassium channel and, L803
myocytes from, angiotensin II-induced calcium oscillations in, in rat, L637
smooth muscle
growth, differential effects of commercial preparations of heparin on, L260
proliferation, in pulmonary hypertensive rats, L101
smooth muscle cells
effects of cold preservation on, L435
serotonin-induced mitogenesis and tyrosine phosphorylation in, inhibition by nitroprusside, L362

Pulmonary edema

glucose uptake and kinetics and, L183, L191
salt and water transport across alveolar and distal airway epithelia in, L487

Pulmonary hypertension

rat model, overexpression of endothelin-1 and pulmonary artery smooth muscle proliferation in, L101

and stimulation of lung pericyte growth by platelet-activating factor, L298

Pulmonary surfactant, *see* Surfactant**Pulmonary vasculature**

see also **Pulmonary artery**
hypoxic vasoconstriction, L962
P_{2x}, purinoceptors in, L889
remodeling
differential effects of commercial preparations of heparin on, L260
and platelet-activating factor stimulation of lung pericyte growth, L298
in pulmonary hypertensive rats, L101
vasodilator response to adrenomedullin, effects of nitric oxide synthase inhibitors, L782

Purinergic receptors

P_{2u}, regulation of chloride secretion, in cultured human tracheal glands, L979
P_{2x}, in pulmonary vascular bed, L889

R**Receptor serine-threonine kinase**

type I, preferential expression in pulmonary blood vessels, L547

Retinoic acid

effects on cell differentiation in tracheal epithelium, L854
postnatal treatment with, effects on lung development, L305
regulation of alveolar formation by, L171

Retinol, *see* Vitamin A**S****Sensory nerves**

destruction, and severity of chronic infection-induced airway inflammation, L393

Sepsis

platelet-activating factor release in, and stimulation of lung pericyte growth, L298

Serine proteinase

inhibitors, effects on stability of tropoelastin mRNA in neonatal rat lung fibroblasts, L376

Short-circuit current

in alveolar epithelium, epidermal growth factor and, L559
in distal airway, L289
in induction of anion permeability by metalloporphyrin ionophores, L386

Signal transduction

in growth response of human airway smooth muscle cells, L795
mechanisms modulating ciliary beat frequency in upper airway epithelium, L745

Sodium channels

in distal lung epithelium, and P_{O2} increase at birth, L1060

Sodium-glucose cotransport

pulmonary, L183, L191

Sodium/hydrogen antiporter

in pulmonary artery, inhibition, differential effects of heparin preparations on, L260

Sodium ions

transport
in alveolar epithelium, effects of epidermal growth factor on, L559
during lung development, L619

Sodium nitroprusside

- effects on calcium-activated potassium channels in porcine tracheal smooth muscle cells, L338
- inhibition of serotonin-induced mitogenesis and tyrosine phosphorylation in vascular smooth muscle cells, L362

Sodium-potassium ATPase

- airway epithelial activity, enhancement by nitrogen dioxide, L266
- developmental regulation in rat lung, L619

Substance P

- and chronic inflammatory response of *Mycoplasma pulmonis* infection in rats, L393
- effects on mast cell degranulation in rat trachea, L985
- plasma leakage and, L393, L404

Substance P receptors

- immunoreactivity on endothelial cells, in rat tracheal mucosa, L404

Superoxide dismutase

- surfactant-mediated uptake by type II cells and lung tissue, L659

Surfactant

- aggregates, conversion in vivo, L152
- effects on lung fibroblasts, L159
- inhaled nitric oxide and, in lambs in vivo, L273
- metabolism in transgenic mice, after granulocyte macrophage-colony stimulating factor ablation, L650
- secretion
 - annexin II and, L668
 - from fetal type II pneumocytes, stimulation by gastrin-releasing peptide, L331
- synthesis by alveolar type II cells, inhibition by nitric oxide, L898

Surfactant proteins

- regulation and distribution after prolonged hyperpnea, L320

SP-A

- gene expression, in vitro analysis of, L504

- measurement, in lambs in vivo, L273
- nitration-induced injury to, L281
- stimulation of phagocytosis by alveolar macrophages, L677

SP-A, SP-B, and SP-C, modulation of lipid uptake by pulmonary epithelial cells, L69**SP-B**

- gene, in rabbit, L601
- gene promoter, functional characterization, L601
- mRNA, TNF- α -induced decrease, in murine lung, L714

Surfactometer

- captive bubble, L273
- pulsating bubble, L273

T**Talin**

- in airway epithelial cells, regulation by PKC- α and calpain II, L526

Tannin

- stimulation of arachidonic acid release from bovine tracheal epithelial cells, L613

Tight junction protein

- ZO-1, in airway epithelium, L224

Tight junctions

- of rabbit tracheal epithelium, effects of HOCl on, L224

Transforming growth factor

- TGF- α , effects on type II alveolar cell chemotaxis in vitro, L311
- TGF- β , cell-specific responses to, and type I receptor serine-threonine kinase expression, L547
- TGF- β 1, cell cycle arrest in G₀/G₁ phase and, L879
- TGF- β 3, regulation of glucocorticoid-induced tropoelastin expression, L992

Transgenic mice

- surfactant metabolism in, after granulocyte macrophage-colony stimulating factor ablation, L650

Tropoelastin

- expression, glucocorticoid-induced, regulation by TGF- β 3, L992
- mRNA stability in neonatal rat lung fibroblasts, serine proteinase inhibitors and, L376

Tumor necrosis factor

- gene, upregulation by adenovirus E1A 13S gene product, L535
- TNF- α
 - effect on surfactant protein B mRNA in murine lung, L714
 - expression in rat lung, and endotoxin-induced group II PLA₂ activation, L752
 - response to endotoxin, in isolated lungs, L62
 - in stimulation of neutrophil adhesion to bronchial epithelial cells, L80

Tyrosine kinase

- growth response of human airway smooth muscle cells and, L795

V**Ventilation**

- surfactant aggregate conversion in, L152

Vinculin

- in airway epithelial cells, regulation by PKC- α and calpain II, L526

Vitamin A

- see also **Retinoic acid**
- deficiency, and ozone-induced lung injury, L475

W**Water permeability**

- distal airway epithelium, in adult lung, L487

X**Xanthine dehydrogenase**

- regulation, and hypoxia, L941

Xanthine oxidase

- and NF- κ B activation by hemorrhage, L729
- regulation, and hypoxia, L941
